

How do I create a module?

Modules are used to organize course content by weeks, units, or whatever organizational structure works for your course. With modules, you are essentially creating a one-directional linear flow of what you would like your students to do. Once you create modules, you can add content items, set prerequisites, and add requirements.

Open Modules

In Course Navigation, click the Modules link.

Add Module

Click the Add a Module button.

Add Module Name

Type a name in the Module Name field.

A dialog box titled 'Add Module' with a close button (x) in the top right corner. It contains a text input field labeled 'Module Name' which is highlighted with a red border. Below the field is a checkbox labeled 'Lock until'. At the bottom right, there are two buttons: a grey 'Cancel' button and a blue 'Add Module' button.

Lock Module Date

Add Module [X]

Module Name [1]

Lock until

Unlock At [2] [Calendar Icon]

August 2016

Su	Mo	Tu	We	Th	Fr	Sa
	1	2	3	4	5	6
7	8	9	10	11	12	13
14	15	16	17	18	19	20
21	22	23	24	25	26	27
28	29	30	31			

Time: [] : [] [] [Done]

Cancel Add Module

If you want to lock the module until a specific date, click the **Lock until** checkbox [1]. To select a date and time, click the **Calendar** icon [2].

Add Module Prerequisites

If you have added at least one module to your course, you can require a prerequisite module. A prerequisite module means students must complete the added modules before they can view the new module. To add a module prerequisite, click the **Add prerequisite** link.

Add Module [X]

Module Name []

Lock until

Prerequisites

[+ Add prerequisite](#)

Cancel Add Module

Add Prerequisite

In the Prerequisite menu [1], select the module that should be completed before the new module. To add additional prerequisite modules, click the Add prerequisite link [2].

Add Module

Click the Add Module button.

View Module

View your created module.

By default, your new module is unpublished. Learn how to [manage modules in draft state](#).
