How might we incorporate technology into our curriculum, instruction and assessment? How are our learners employing this technology? How can we begin to measure the impact of these innovations on student learning? In this presentation, we will explore current trends in learner ownership and usage, describe applications of technology, and discuss their impact on learning. Samples of ways in which computer technology has been integrated into courses will be featured. These methods include student websites, e-portfolios, blogs, wikis, Google Apps, Skype, and a variety of other Web 2.0 tools. Attendees will have the opportunity to share their own strategies for technology integration.

Meet the presenter:

Dr. Arzt holds a Ph.D. from University of Connecticut’s School of Education in Curriculum and Instruction, focused on computer technology. At the University of Saint Joseph, she teaches *Computers in the Classroom, Integrating Technology and Literacy, Educational Research, The Art of Effective Writing, First Year Seminar*, and other courses. She frequently publishes and presents at conferences on the topic of computer education in higher education.

RSVP by October 9th to celt@bridgeport.edu.
A light lunch will be served.
