

Call for Papers
Design of Wireless LANs (WLANs)
Journal of Internet Technology

Wireless local area networks (WLANs) technology constitutes a fast growing market, which introduces the flexibility of wireless access in buildings, campus, single rooms, etc. WLANs ad-hoc networks allow communications without previous planning. Also, they allow the design of small, independent devices. Last but not least, WLANs provide high degree of robustness where they can survive disasters.

Papers related to the design issues of WLANs are solicited for a special issue of the Journal of Internet Technology. Topics of interest include, but are not limited to, the following:

- Radio transmission
- Infrared Infrastructure networks Ad hoc networks
- IEEE 802.11
- HIPERLAN
- Bluetooth
- Quality of service
- Safety and security

Instructions for Manuscripts

All manuscripts should be sent by email to the special issue editor by the 15th of July 2002. The following electronic formats for the manuscript are acceptable: DOC, PS, and PDF. The covering letter should indicate the names of the authors and their affiliations and their addresses, faxes and emails. Manuscripts should strictly follow the guideline of the Journal of Internet Technology at: <http://jit.ndhu.edu.tw/English/englisha.htm#info>

Important dates

June 15, 2002	Deadline for paper submission
September 15, 2002	Notification of acceptance
November 15, 2002	Final Manuscript due
April 2003	Publication in special issue
