Master of Science in Chinese Herbology

Combine traditional healthcare practices with wellness-based methods

Relied on for its holistic and conservative approach to healthcare, Chinese Herbology promotes mindfulness and whole-body wellness through herbal treatments and remedies. Chinese herbologists care for patients wishing to supplement modern medicine with time-tested treatments and complementary therapies. When you earn your Master of Science (MS) in Chinese Herbology at University of Bridgeport, you prepare for a fulfilling career providing balanced care to your community.

Explore traditional care through a modern lens

When you earn your MS in Chinese Herbology at UB, you'll expand your knowledge of traditional treatments and their possibilities — exploring herbal remedies and their capability to support and restore the human body and mind. Taught by expert faculty with decades of field experience, our in depth curriculum explores evidence-informed practices, medical ethics, botanical medicine, and more. Better still, you'll enjoy the freedom and flexibility of a hybrid schedule — helping you maintain personal and professional balance while you earn your degree.

Explore our Traditional Chinese Medicine programs today

The curriculum for MS in Chinese Herbology covers four different areas: herbal medicine, Asian/ Chinese herbology, related areas including ethics and evidence-informed practices, and clinical education. See the course catalog to view the full curriculum.

Gain hands-on experience in the UB community

Students in UB's Chinese Herbology program benefit from hands-on clinical training in our on-campus clinic, providing comprehensive care to the greater Bridgeport community. This clinic will also serve as your home base for studying, observing, and applying the skills you learn in the classroom. As you work towards your degree, you will gain real-world experience — completing semester-long rotations to learn the ins and outs of Chinese Herbology.
