

Earn your certificate in as few as 16-20 months

Prepare for success on the Certified Professional Coder (CPC) exam

Benefit from the freedom and flexibility of online learning

## Certificate in **Medical Billing and Coding**

Achieve a career working behind the scenes in healthcare

***Our healthcare system depends on more than doctors, nurses, and direct care providers. It relies on skilled professionals working behind the scenes to keep patient care moving forward. With a Medical Billing and Coding certificate from University of Bridgeport (UB), you'll gain the specialized knowledge to convert medical information into standardized codes that ensure providers receive accurate reimbursement and patients experience smoother, more transparent billing.***

### Discover the administrative side of healthcare

If you want to make a difference in healthcare without working in a clinical setting, this program offers a rewarding, behind-the-scenes role in patient care. As a Certified Professional Coder (CPC), you'll bridge the gap between patients, providers, and insurance companies, helping reduce confusion and streamline the billing process.

You'll learn to:

- Apply diagnostic and procedural codes
- Interpret and analyze medical records
- Navigate healthcare documentation and insurance systems
- Stay current with evolving technology and regulations

### Flexible learning that fits your life

UB's Medical Billing and Coding program is offered in a live online (synchronous) format with a hybrid capstone, allowing you to balance your education with work and family commitments. You'll get personalized attention from expert faculty in an interactive learning environment designed to help you thrive.

With three start dates each year, you can earn your certificate in as few as 16–20 months and prepare to sit for the Certified Professional Coder (CPC) exam — the industry standard for billing and coding professionals.
